PROFESSIONAL SUMMARY

MSc Computer Science graduate (CGPA: 8.2 | Dravidian University, 2026) with hands-on Data Science internship experience (AIVariant) and an MSc capstone in NLP-based sentiment analysis. NASSCOM-certified with ExcelR Data Science Certification — Distinction. Built a multi-class Alzheimer's disease classification system achieving ~95% accuracy, and an NLP sentiment classifier for customer reviews handling multilingual text and class imbalance. Proficient in Python, Scikit-learn, SQL, MySQL, Tableau, Streamlit, and Flask across the full ML lifecycle from EDA to deployment.

PROJECTS & INTERNSHIP EXPERIENCE

Alzheimer's Disease Classification (AIVariant, Data Science Intern | 04/2026 – 07/2026)

Python · Scikit-learn · XGBoost · Random Forest · SVM · KNN · Streamlit

- **Objective:** Build a multi-class machine learning system to classify Alzheimer's disease stages from clinical/biomarker data to support earlier diagnosis.
- **Business Need:** Manual diagnosis of Alzheimer's stages is time-consuming and inconsistent across clinicians, delaying treatment decisions; a reliable automated screening tool was needed to support (not replace) clinical judgment.
- **Approach:** Built a 4-technique feature selection voting system (Chi-Square, T-Test, Mutual Information, Random Forest importance) to identify the most predictive biomarkers, then trained and benchmarked 6 algorithms (Logistic Regression, Decision Tree, Random Forest, SVM, KNN, XGBoost), and deployed the best-performing model as a Streamlit application for clinical use.
- **Outcome:** Reached ~95% classification accuracy with Random Forest and XGBoost, giving stakeholders a deployable, easy-to-use decision-support tool that can help flag disease stage faster and more consistently than manual review.

NLP Sentiment Analysis — Amazon Samsung Reviews (AIVariant, Data Science Intern | 07/2026 – 08/2026)

Python · TF-IDF · SVM · NLP · Scikit-learn

- **Objective:** Build a 3-class sentiment classifier (positive/neutral/negative) for Amazon Samsung mobile phone reviews to help gauge customer opinion at scale.
- **Business Need:** Manually reading and tagging large volumes of customer reviews doesn't scale; businesses need an automated, accurate way to surface customer sentiment — especially the harder-to-detect neutral/mixed feedback — to guide product decisions.
- **Approach:** Cleaned and preprocessed a 1,440-review dataset including ~12 Hindi (Devanagari-script) reviews, fixed a negation-handling bug in text preprocessing, engineered handcrafted linguistic features, vectorized text using TF-IDF, and benchmarked classical ML models while optimizing for macro F1 to counter class imbalance.
- **Outcome:** Best model (SVM + TF-IDF) reached 78.82% accuracy with a materially improved F1-score on the minority Neutral class, and a 13-slide professional presentation was built to summarize findings for stakeholders.

EDUCATION

MSc Computer Science: Dravidian University, Kuppam — Specialization: Data Science & Artificial Intelligence, CGPA: 8.2/10 (2024 – 2026)

BSc Computer Science: Siddhartha Degree College, Visakhapatnam — First Class, 75% (2021 – 2024)

TECHNICAL SKILLS

- **Languages & Libraries:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, TensorFlow/Keras (Basics)
- **ML & Statistics:** Classification, Regression, Feature Engineering, SMOTE, XGBoost, Hypothesis Testing, SHAP, NLP (TF-IDF)
- **Evaluation & Tools:** AUC-ROC, F1-Score, Precision-Recall, Jupyter, Git, GitHub, Excel, Streamlit, Flask
- **Database & Visualization:** MySQL, SQL, Tableau, Power BI (Basics)

CERTIFICATIONS

- Data Science Internship — AIVariant | Code: AIV/25-26/Q3/07/19116 | 19 Apr 2026 – 20 Jul 2026
- Data Science Certification with Distinction — ExcelR Solutions | Completed: 15 May 2026 | Reg No: 22115/EXCELR/15052026
- NASSCOM FutureSkills Prime — Masters Program in Data Science | ID: FSP/2026/7/10336105 | Issued: 23 Jul 2026

- 100 Days of Code: The Complete Python Pro Bootcamp — Udemy / Dr. Angela Yu | 56.5 hrs, Dec 2025 | ID: UC9772f660

ADDITIONAL INFORMATION

Languages: English (Professional), Telugu (Native) | Typing: 85 WPM

Interests: Chess, Competitive Coding
